

STOP PEBBLE MINE

IT SHOULD BE DEAD BUT IT'S NOT

Instead, Pebble Mine is on a fast track for approval.

If fully developed, Pebble Mine will contaminate the pristine waters of Bristol Bay with 10.2 billion tons of toxic waste.

It will destroy a \$1.5 billion fishery, wipe out 14,000 sustainable Alaskan jobs, and devastate a way of life that has sustained the people of this region for countless generations.

The Environmental Protection Agency can end this threat once and for all.

THE TIME TO ACT IS NOW

TELL THE EPA TO VETO PEBBLE MINE

StopPebbleMineNow.org

BRISTOL BAY DEFENSE FUND is a coalition of business, tribal, nonprofit, and community organizations dedicated to protecting Bristol Bay from the urgent threat of the Pebble Mine.
